

Prime Conduit

TO: To Whom It May Concern:

FROM: Jeremy Zeliff

SUBJECT: LEED Requirements for Recycled Content

DATE: May 27, 2020

Prime Conduit Inc. is an environmentally conscious company that believes in recycling materials both Pre-Consumer and Post-Consumer as defined by *ISO 14021* and LEED® standards. These include materials diverted from the waste stream during the manufacturing process as well as purchased recycled materials.

Pre-Consumer reprocessed Polyvinyl Chloride (PVC) is 100% reutilized and reclaimed within the same process that generated it. Recycled PVC suppliers to Prime Conduit Inc. certify that the material purchased contains a minimum of 20% Post-Consumer Materials.

On average 6% of all production is either Pre or Post-Consumer materials. The amount of recycled material varies slightly depending on availability and product type, but will average what is given above. For any further information about our recycling program, please feel free to contact me.

Our manufacturing locations are listed below:

Oklahoma City, Oklahoma
Woodland, California
Nazareth, Pennsylvania
High Springs, Florida

Sincerely,

Jeremy Zeliff
