

# Prime Conduit

TO: To Whom It May Concern:

FROM: Jeremy Zelif

SUBJECT: MSDS for Conduit and Fittings

DATE: May 27, 2020

---

MSDS are not provided for conduit, elbows, or fittings, etc. because those products are an "article" under the OSHA Hazard Communication Standard (HSC), 29 CFR 1910.1200.

The Hazard Communication Standard has an exemption for articles. To fall under the article exemption, the product must be a manufactured item: (1) which is formed to a specific shape or design during manufacture; (2) which has end-use functions dependent in whole or in part on its shape or design; and (3) which does not release, or otherwise result in exposure to, a hazardous chemical under normal conditions of use. The PVC conduit, elbows, or fittings, etc. produced by Prime Conduit meet all of these criteria and, consequently, are exempt from the Hazard Communication Standard.

Please refer to the following web page for more information:
